

## **Grants - State and Federal Funds**

**3215**

The board of education will review grants or funds sponsored or recommended by state or federal agencies or other agencies. If the acceptance of these funds appear to be in the best interest of the education of the youth or patrons the school district school officials will be instructed to apply for the funds and oversee that the funds are spent for their intended use. The criteria for accepting such funds shall be the part these funds play in the support and maintenance of the school system and how the funds enhance the education programs for the students or patrons of the school district.

The funds derived from these programs shall become a part of the school's financial accounting program, administered by the superintendent of schools or his or her designee, and processed through either the school's General Fund or the school's Activity Fund.
