

Release From Contract

4545

Teachers who wish to be released from their contract will follow the provisions set forth in the negotiated agreement between the teachers association and the Board of Education.

Requests after the deadline will be permitted only if a suitable replacement can be found.

The board of education reserves its right to contact the Nebraska Professional Practices Commission for those certificated personnel who may breach their contract obligations after the afore-mentioned date. The primary consideration for the board of education shall be the welfare of the students.

Teachers who resign their position during the school year may receive the unpaid portion of their earned salary on the next payment date if there is sufficient money to do this without depriving other creditors. If sufficient money is not available the balance due the teacher will be paid on a regular monthly schedule until the balance due the resigned teacher has been paid.
