

## Field Trips

6315

Field trips and community service activities are encouraged when they can contribute to the learning process in a manner that can not be achieved within the standard classroom setting.

All field trips and community service activities must have the approval of the administration and are to be reported to the superintendent of schools prior to the activity. Each field trip will come within the policies of the school district and any applicable administrative regulations established by the board of education or the superintendent of schools.

Refer to AR-6315, Guidelines for School-Approved Out of Classroom Activities.

The superintendent of schools must approve any solicitation for funds for trips.
