

Students enrolled in this school district may enroll simultaneously with an institution of higher learning. Students must meet the following criteria:

- I. Student must meet the prerequisites as established by the other institution and have written permission from the institution of higher learning authorizing dual enrollment.
- II. Students must enroll in the necessary classes offered through this school district to meet the prerequisites for graduation from this school district.
- III. The superintendent of schools and the secondary principal will act on the request.
- IV. The student must be enrolled in a minimum of seven class periods per semester at the high school level which may include dual credit classes as part of the seven class periods. Any deviation from this must have the approval of the administration. The plan developed by the student and the administration should involve graduation from this high school no later than the student would have graduated had he or she not participated in the dual enrollment program.
- V. A favorable approval of the plan by the administration will necessitate the student making application and being accepted at the post-secondary school, and following through with the other registration procedures as outlined in this policy.

This school district will not be responsible for any tuition, other fees, or transportation costs incurred through dual enrollment. Credits earned at a post-secondary institution must be evaluated and approved by the secondary principal prior to enrolling in any course to determine if credits earned at the post-secondary institution may be applied toward graduation requirements of this school district.
